

Late Filing

Dear FCC Commissioners & Staff:

I am writing about: Appropriate Framework for Broadband Access to the Internet Over Wireline Facilities.

This is wrong. Wrong to me as a consumer. I have had cable internet. It was always down. I have had phone company internet. They always had problems and were slow. Now I have my own home town local ISP, TPISP Internet. They give me good dial-up internet access. If I have problems or need repairs, they know what to do and how to fix it. I can walk into their office and there's always a 'competent person' who knows what to do. I never got this from cable. I never got this from the phone companies. I DO get this and much much more from my ISP. Even better, they cost less, provide jobs to my community, and pay taxes which come back into my own community.

This bill is wrong. Wrong for me. Wrong for the Internet. Wrong for Service in my area. And, just wrong in general. It's just like setting up a monopoly. Don't do this.

Sincerely,

Janet Liberty
